Art Unit: 1722

1. The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

Arrangement of the Specification

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) TITLE OF THE INVENTION.
- (b) CROSS-REFERENCE TO RELATED APPLICATIONS.
- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.
- (d) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC (See 37 CFR 1.52(e)(5) and MPEP 608.05. Computer program listings (37 CFR 1.96(c)), "Sequence Listings" (37 CFR 1.821(c)), and tables having more than 50 pages of text are permitted to be submitted on compact discs.) or
REFERENCE TO A "MICROFICHE APPENDIX" (See MPEP § 608.05(a). "Microfiche Appendices" were accepted by the Office until March 1, 2001.)
- (e) BACKGROUND OF THE INVENTION.
 - (1) Field of the Invention.
 - (2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.
- (f) BRIEF SUMMARY OF THE INVENTION.
- (g) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).
- (h) DETAILED DESCRIPTION OF THE INVENTION.
- (i) CLAIM OR CLAIMS (commencing on a separate sheet).
- (j) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).
- (k) SEQUENCE LISTING (See MPEP § 2424 and 37 CFR 1.821-1.825. A "Sequence Listing" is required on paper if the application discloses a nucleotide or amino acid sequence as defined in 37 CFR 1.821(a) and if the required "Sequence Listing" is not submitted as an electronic document on compact disc).

2. The disclosure (i.e., pp. 1 and 3) should not refer to specific claim numbers because the content of claims and the numbers themselves can change during prosecution thereof.

3. The disclosure is objected to because of the following informalities: on p. 5, line 24, "trough" should be changed to --through-- for proper spelling.

Appropriate correction is required.

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 7-12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 7, line 9, "the nozzle" should be changed to --the second nozzle-- because it is ambiguous as to what it refers since there are multiple nozzles being claimed.

Claim 10 recites "is provided" which is indefinite as to its metes and bounds because it is manipulative step in an apparatus claim. The examiner suggests changing "provided" to --included--.

Art Unit: 1722

6. Claims 7-12 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.

7. The following is a statement of reasons for the indication of allowable subject matter: the prior art of record does not teach or reasonably suggest the combination of elements defining the apparatus of the instant claims, particularly including the at least one nozzle, which is pivotably mounted by the means of the joint with the ball, which can be displaced by the pivoting device in the two axes extending at right angles to one another, the at least one connecting duct being constructed in the ball, of which the one end is connected to the stationary feed duct and the other end to the pivotable nozzle, the second nozzle which is arranged concentric to the first nozzle, and the second connecting duct constructed in the ball, of which the one end is connected to the second stationary feed duct and the other end to the second nozzle.

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Belshaw et al.(-178), Svengren(-580), Steinecke et al.(-620) and Tonsi et al.(-183) are cited as of interest.

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Joseph
